

STORMSHIELD®
Intelligent Client Security

Securing your mobile endpoints and sensitive data

Sean Martin, CISSP
SkyRecon Systems, Inc.
Vice President, Marketing

Financial Loss

- Nearly every organization uses firewall and anti-virus technologies
 - 98% for firewalls
 - 97% for anti-virus

... yet ...

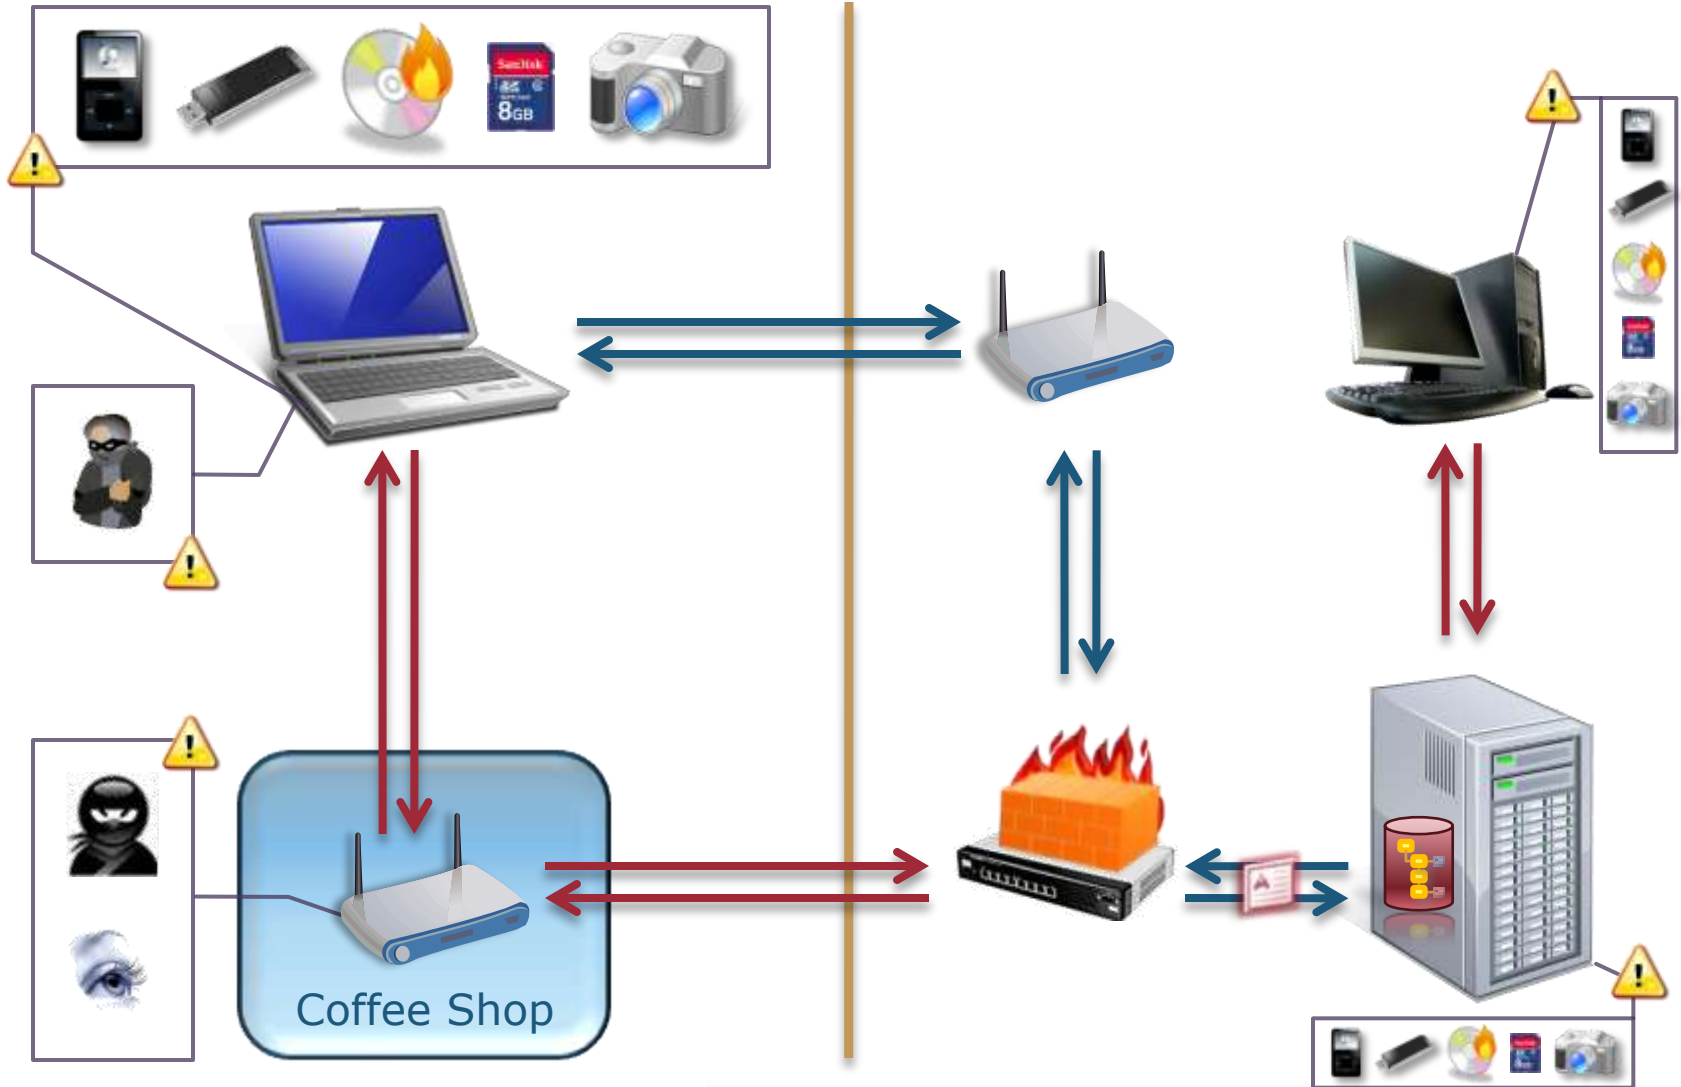

- They still experience significant financial loss
 - Top 4 sources represent nearly 75% of total loss
(Average loss = \$124,553 / company)
 - » Virus incidents (Avg. \$50,132 / company)
 - » Unauthorized access (Avg. \$33,920 / company)
 - » Loss of laptops/mobile data (Avg. \$21,223 / company)
 - » Theft of proprietary information (Avg. \$19,278 / company)

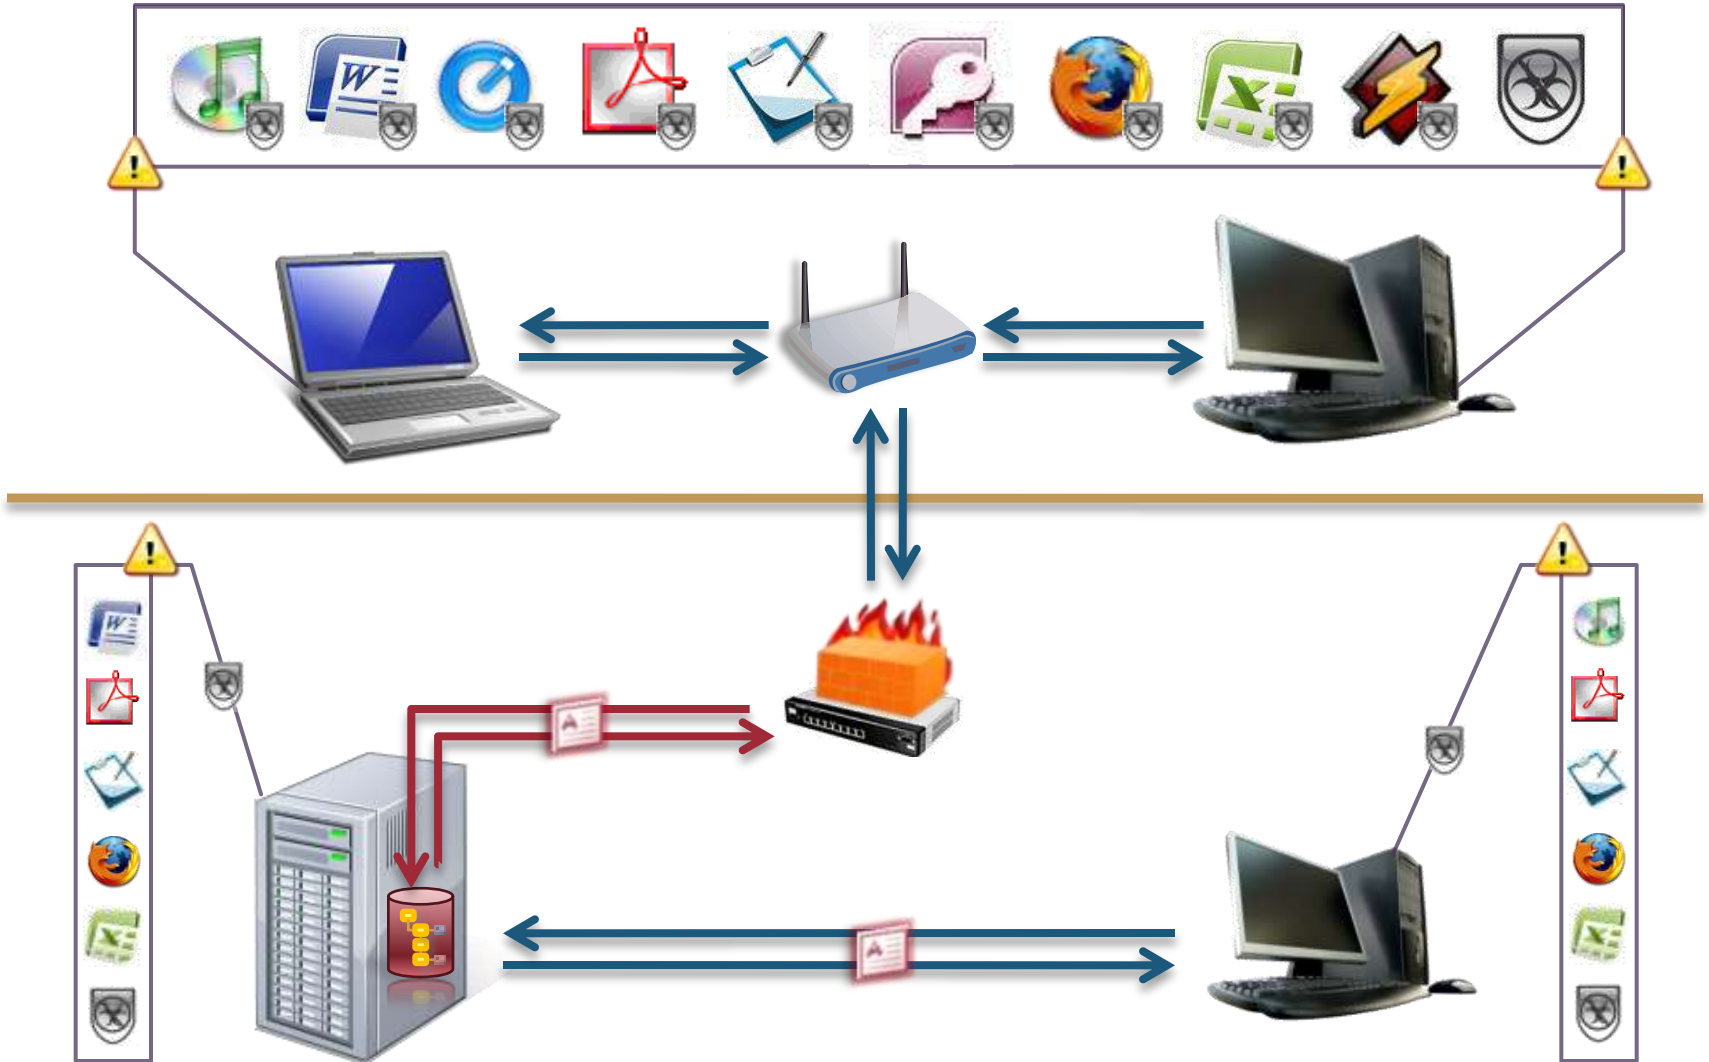

...and the related impact of lost:

- » reputation
- » brand value
- » customers
- » prospects
- » sales
- » revenue
- ???

Mobile Workers | Data Leakage

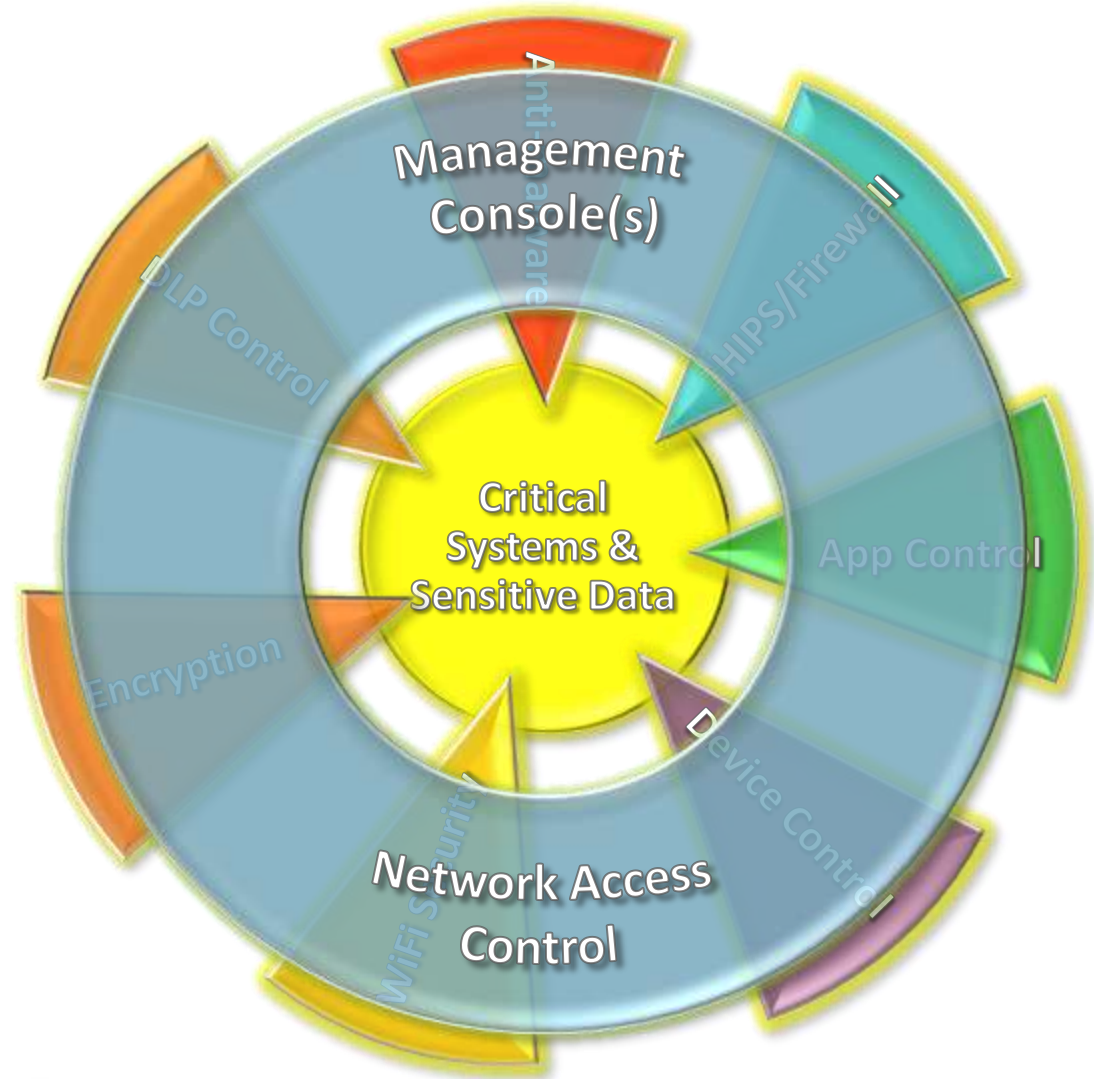

Rogue Applications | Malware

Typical Vendor Response

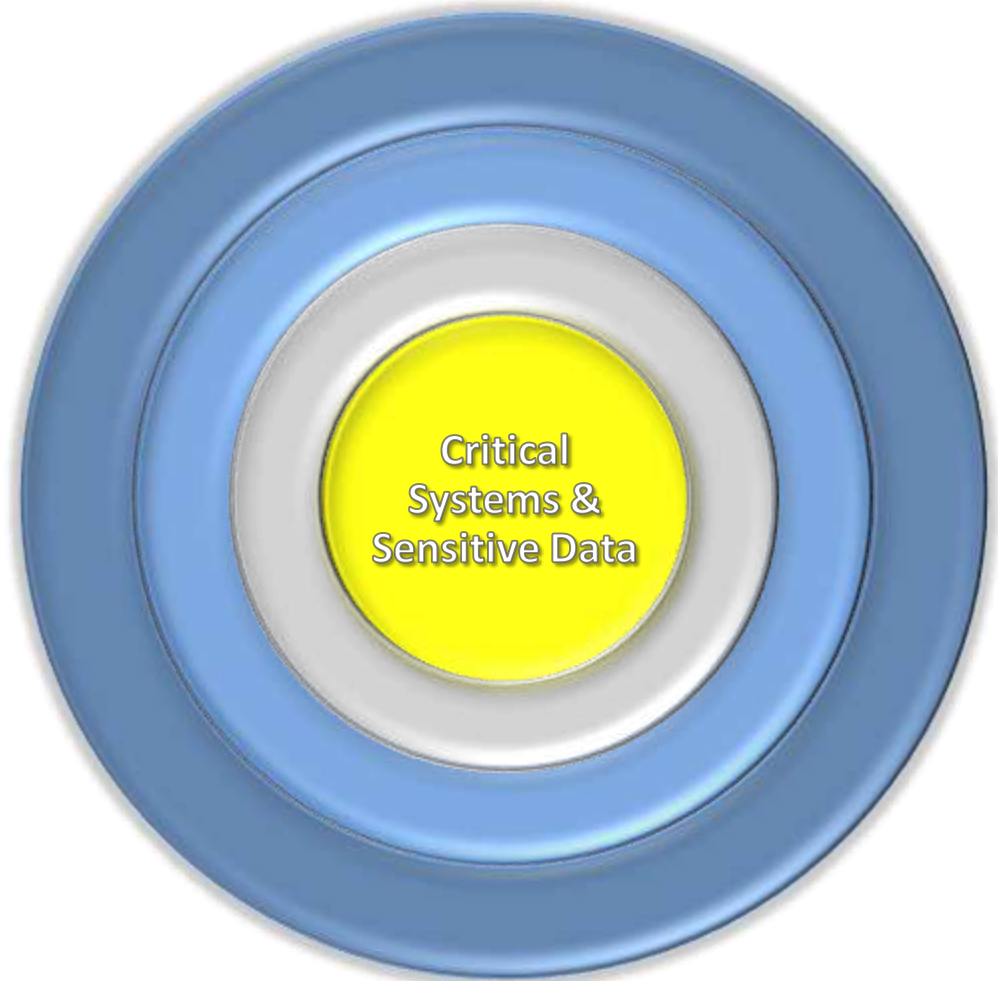

- MULTIPLE AGENTS**
deployment & management
nightmare, unacceptable
resource requirements
- DISJOINTED FEATURES**
technologies work in silos,
system and data still exposed to
threats
- MULTIPLE POLICIES**
difficult to achieve internal
policy, let alone prove
regulatory compliance

Client Security Requirements

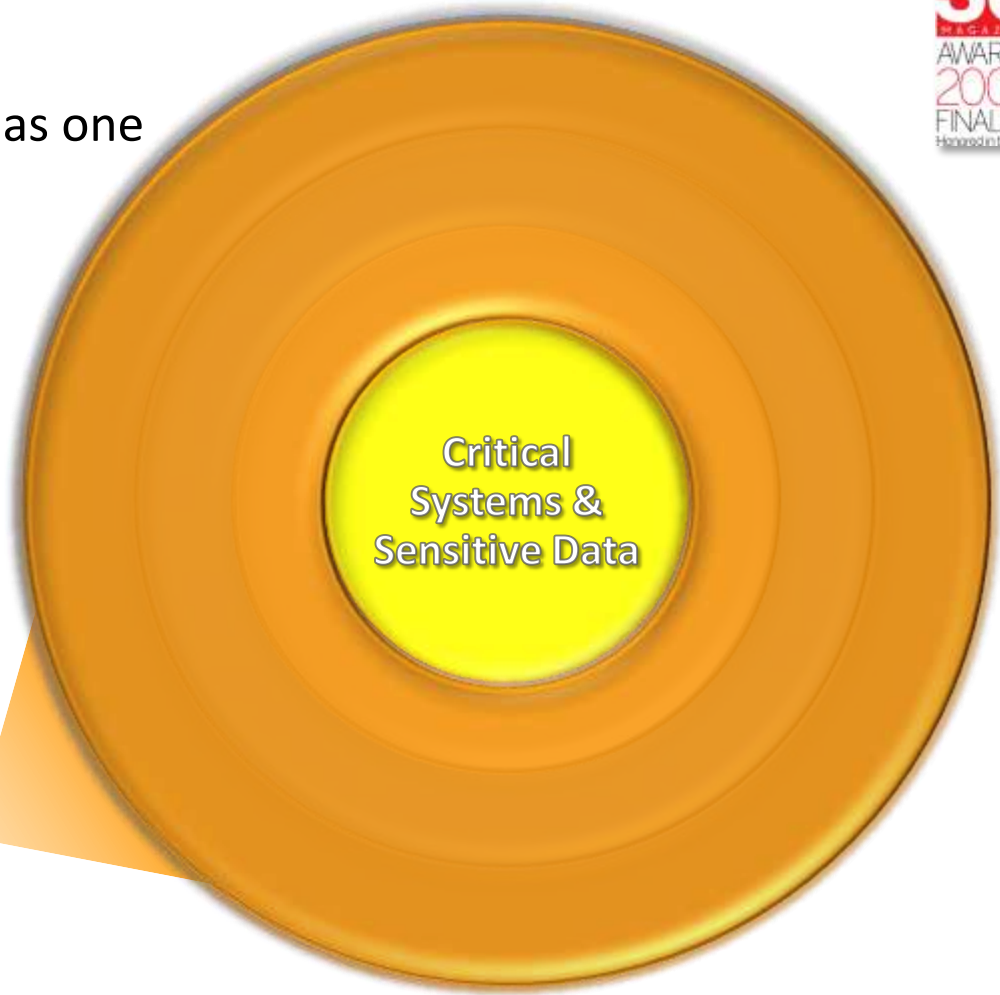

- **DATA PROTECTION**
prevent data theft, leakage, and misuse
- **SYSTEM PROTECTION**
block unauthorized access, unauthorized use, and attack
- **POLICY ENFORCEMENT**
ensure compliance with internal policy and external regulations

Integrated Client Security

- Single, lightweight agent (7MB)
- Protection layers work together as one
- Centralized, role-based console
- Dynamic policy control
- Enterprise-level reporting
- Regulatory/compliance auditing
